

Professional Training Overview

SUPPORTING CLIENTS THROUGH PSYCHOSIS

● SESSION DESCRIPTION

This recovery-oriented training, grounded in **lived experience, research, and clinical insight**, examines how **implicit bias, stigma, and healthcare trauma** can shape outcomes for people with psychosis. It equips clinicians with practical, relationship-centered approaches to **building trust, strengthening therapeutic alliances, and supporting recovery**.

● LEARNING OBJECTIVES

- **Challenge** implicit biases
- **Recognize** recovery as realistic
- **Reduce** stigma & promote dignity
- **Strengthen** therapeutic relationships

"I appreciated the **perspective from someone with psychosis** so I can provide more beneficial services. **Book this training** to gain a **more compassionate understanding** of individuals with psychosis."

— **Melissa Quiroz**

Director of Behavioral Health Integration & Residency
HealthLinc Community Health Center, Indiana

● KEY TOPICS

- **Implicit Bias** in Mental Healthcare
